

CUSTOM FLAGS INSTALLATION

Adding a custom flag icons set is fast and easy.

CHANGING THE FLAGS

- » Copy all image files inside folder /Flags (GlossResources.zip)
- » Paste them to directory Root/images/Flags/ in your DNN installation
- » (If you don't want to loose existing flags, remember to make a copy of them first)
- » You're done!

Set of icons created by Mark James (<http://www.famfamfam.com>)
